CloudComputing Internship(AWS)- SprintM Technology

PROJECT

SMART CAR DETECTION USING ROI(REGION OF INTEREST BASED KALMAN FILTERS: A real-time vehicle detection and tracking system was developed using Haar Cascade classifiers and Kalman Filters. Features include ROI filtering, virtual line logic for counting vehicles, and Tesseract OCR for license plate recognition. It is a lightweight, cost-effective solution without GPU dependency.

AIRLINE RESERVATION SYSTEM: : A real-time airline reservation system was built with flight booking, ticketing, and passenger management modules. It includes flight search, seat allocation, e-ticketing, booking updates, and revenue reporting, all supported by a centralized database to streamline operations and improve customer experience.

EXPERIENCE

Intern – Cloud Computing (AWS), SprintM Technologies (Google for Education Partner)

Sep 2025 – Nov 2025 | Remote/Offline

Gained hands-on experience with AWS cloud services through mentorship, projects, and real-time resource management. Showcased professionalism by meeting deadlines, communicating effectively, and steadily advancing skills
